

PRESS RELEASE

MLM Medical Labs and Cenetron Central Laboratories Announce Strategic Alliance

Central laboratories expand transcontinental reach with integrated services.

MÖENCHENGLADBACH, GERMANY AND AUSTIN, TX (PRWEB) - NOVEMBER 11, 2015

MLM Medical Labs, based in Mönchengladbach, Germany, and Cenetron Central Laboratories, located in Austin, Texas, USA, jointly announced today a strategic alliance, formed to provide their pharmaceutical and CRO clients with integrated central laboratory services for global clinical trials.

MLM and Cenetron will offer seamless laboratory testing for European and North American client sites, with harmonized custom kit design and construction, sample logistics, laboratory testing, and data management.

“We are very impressed by the excellent match between both companies, especially Cenetron’s customer focus and its capabilities. Both companies are completely dedicated to clinical trials and managed by their owners. This will allow us to provide our clients with the same highly flexible and reliable central laboratory services in North America as they are accustomed to for their European trials,” said Stephan Wnendt, CEO of MLM Labs.

Dwight DuBois, Cenetron’s CEO commented, “We are extremely pleased to form a partnership with MLM Medical Labs in order to expand the breadth and depth of our laboratory services. Cenetron and MLM share a work culture that fosters a high level of expertise, a commitment to quality, and excellent customer service. We have complete confidence in the infrastructure, the processes, and most importantly, the people at MLM.”

About Cenetron Central Laboratories

Cenetron Central Laboratories is a premier provider of molecular and general laboratory services. A CAP certified and CLIA registered laboratory, founded in 1995, Cenetron has supported pivotal global trials in North America, Europe, Africa, and the Pacific Rim. Cenetron’s client list includes leading pharmaceutical clients in the United States and Europe.

About MLM Medical Labs

MLM Medical Labs was founded in 1993 and is a CAP- and DIN EN ISO 15189-accredited, GLP-certified and CLIA-registered central and specialty laboratory dedicated exclusively to clinical trials. The company has a very broad portfolio of validated biomarker assays and provides all services for general laboratory trial support. MLM's services are offered 365 days a year. MLM's clients are CROs, biotech and global pharmaceutical companies based in Europe, Eastern Europe, Asia and the United States.
